Desktop PC and Server Solutions for Business

ABOUT MINDVISION

At MindVision we provide a full range of Information Systems and Technology services to clients, including custom-built PCs and servers, hardware and network maintenance, software solutions, websites, project management and advisory for small and medium-sized companies. We work with and provide solutions to government bodies, manufacturing companies, professional services firms, medical facilities, construction companies and in financial services. Our team has a robust combination of experience in information and communications technology (ICT) implementation and advisory across the public and private sector and with both small and large organisations. Our experience allows us to provide our clients with unique perspectives in achieving both technology and business value from their information systems investments. We aim to establish long-term and stable relationships with our clients to help them understand their information systems, solve problems and develop solutions. In total, our perspectives, ideas and experiences makes us confident in our ability to provide our clients with solutions to meet their needs and expectations.

FOCUS ON YOUR BUSINESS' STRENGTHS

MindVision's branded Desktop PC Workstations and Servers are designed to remove the frustration from working with computers and allow you to focus on your work instead of the computer's performance. We'll help you choose the right computer for your needs and provide the support to keep things working. All our workstations come with a warranty and full technical support.
